

Block out the noise. Focus in on beautiful sound.

To access Harman Kardon-quality sound in such a comfortable, lightweight, in-ear headphone marks a truly awe-inspiring, road-ready occasion. Highly functional, their one-button remote/microphone lets you take advantage of most smart devices while their active noise cancellation deals with those times when you've got better things to listen to than those around you. From its micro USB charging facility to its distinctive patent Freebit™, 'no-slip' ergonomic ear tips and handy travel pouch, Soho II NC is every ounce the ultimate in travel companions that promise to work as hard as they play.

Features

- ▶ Exceptional Harman Kardon sound performance in a lightweight, comfortable in-ear 'travel-friendly' design
- ▶ Active noise cancellation joins with a one-button/microphone/remote for the ultimate in controlled environments and smart device functionality
- ▶ Maximized, comfortable fit from patent Freebit™ ergonomic ear tips for secure listening with premium sound
- ▶ Portability at its finest with charging access through its micro USB port, an in-flight adapter and attractive carrying pouch to keep things safe and secure

Exceptional Harman Kardon sound performance in a lightweight, comfortable in-ear 'travel-friendly' design

Two 9 mm Harman Kardon drivers deliver memorable sound, belying their 'mini' size while their smaller, lightweight design translates to longer listening without fatigue or burn-out of any kind.

Active noise cancellation joins with a one-button/microphone/remote for the ultimate in controlled environments and smart device functionality

No matter your environment, Soho II NC controls what you hear – and don't hear thanks to active noise cancellation for up to 35 hours at a time. Should you need to take that call, you're one-button away from staying connected to the outside world at your discretion.

Maximized, comfortable fit from patent Freebit™ ergonomic ear tips for secure listening with premium sound

In-ear headphones are great – until they fall out. This can't happen with the high-end ear tips that work with active noise cancellation to keep external sounds out. All the better to savor the superior Harman Kardon sound within.

Portability at its finest with charging access through its micro USB port, an in-flight adapter and attractive carrying pouch to keep things safe and secure

Harman Kardon thinks of everything and Soho II NC is equipped with all you need to maintain your on-the-go lifestyle on your terms. From Soho II NC's handy charging facility to an in-flight adaptor for accessing the in-flight movie or listening channels, there's even a handy carrying pouch to keep it all together when you're taking a break.
