

# GTX500 Mono Subwoofer Amplifier

Compact style. Killer sound.

**Compact, affordable and easy-to-install subwoofer amplifier designed to deliver exceptional bass response at a fraction of the cost.**

The JBL GTX500 is the ideal upgrade for those car audio enthusiasts who want exceptional bass without breaking the bank. And don't let its size fool you. While the GTX500 may be compact, with a max power output of 750 watts you can drive your subs as you see fit. While its true JBL sound sets it apart from other subwoofer amps, its ease-of-use and installation, configuration and calibration makes it truly stand out—it connects to OEM or aftermarket systems without complicated adapters or setup routines.

## Features

- ▶ Big power: 770 watts peak
- ▶ Variable electronic crossover
- ▶ Pristine signal for great sound

# GTX500 Mono Subwoofer Amplifier

Compact style. Killer sound.

## Big power: 770 watts peak

Cars are small, and the space inside them is a challenge to audio engineers. But the GTX500 gives you big, commanding sound. You'll have 350 watts of RMS at an impedance of 4 ohms, 500 watts at 2 ohms and 770 watts at peak power.

## Variable electronic crossover

The GTX500's variable crossover allows you to optimize tuning based on your speaker location and specific components. And you can do it whether you're a rocket scientist or not.

## Pristine signal for great sound

With a frequency response of 10Hz to 280Hz, the GTX500 reproduces deep bass tones cleanly. Its full-range preamp outputs allow for multiple hookups without high-loss Y-adapters or signal splitters. Music reaches the amp and passes through it with clarity and fidelity.

## Technical specifications:

- ▶ Type: Class D Mono Subwoofer Amplifier
- ▶ Peak power handling: 770W
- ▶ Power handling, continuous average: 500 RMS
- ▶ Frequency response: 10Hz – 280Hz ± 0.5dB
- ▶ Signal to noise ratio: >80dB ref 1W
